August 2018 Edition

August Meeting Minutes

Russ Ramirez, K0WFS, called the meeting to order at 1 PM. 16 members were present.

- Introductions made around the table.
- The June 2018 Minutes were approved.
- No treasurers report this meeting as the treasurer was out of town.

Old Business:

Russ, K0WFS, reviewed the items available from the estate of WA9AMZ. There were a number of magazines available for anyone that wanted them. Some were very old QST issues. There was also some equipment for sale. Additionally, there will be some antique radios listed on e-bay.

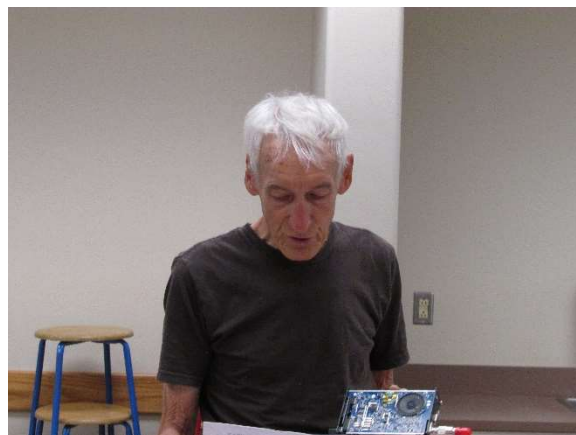

New Business:

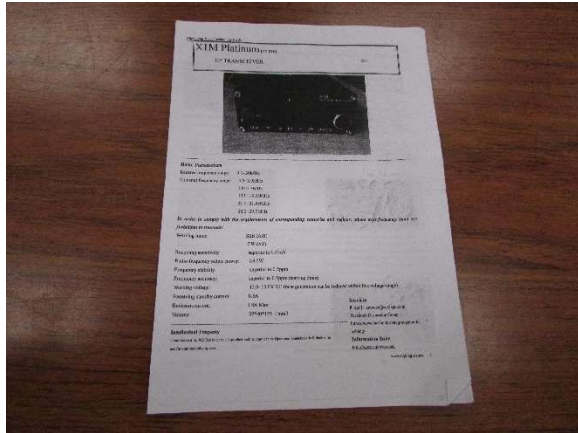

The Twin City FM club will have a tailgate swap meet October 6 at the West Medicine Lake Community Center.

The next MARTS meeting will be Sept. 8 due to Labor Day.

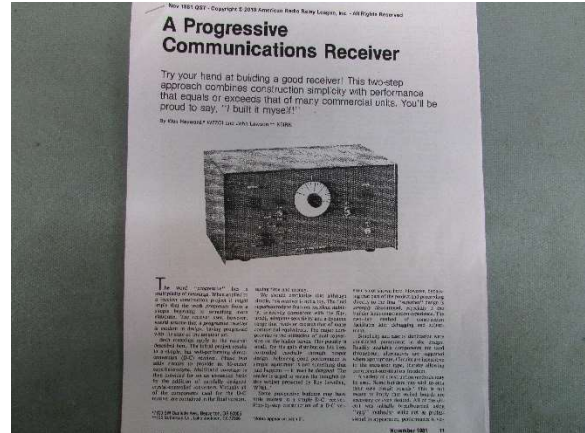

Show and Tell:

John Krawczak, KJ0P, brought in his X1M Platinum QRP rig. This is a 5 watt CW & SSB rig with a digital interface. It also has a keyer and 20 memories. It comes with a lamp to be used for transmitter calibration. It has a good display and is menu driven. John has made a number of contacts with it and reports that he is pleased with the rig.

Steve Ulrich, NW0C, brought in an analog dial from National RF. It has a 6:1 reduction and accommodates a 1/4" shaft. He plans to use it on an upcoming project which will closely follow the Progressive Receiver plans found in the November 1981 QST. Steve was able to obtain some circuit boards for the project from FAR Circuits. These turned out to be single sided boards of good quality.

There was no presentation this month.
